SUMMARY

Software Engineer with 4+ years of experience building scalable web applications using Angular, TypeScript, JavaScript, Node.js, Express.js, REST APIs, and databases including MongoDB and PostgreSQL. Experienced in developing enterprise applications, modernizing legacy systems, improving application performance, and building reusable, scalable UI components. Strong experience with state management, authentication, API integration, performance optimization, and Agile development.

TECHNICAL SKILLS

- Frontend Technologies: Angular, TypeScript, Javascript, HTML5, CSS3
- Backend Technologies: Node.js, Express.js, ASP.Net, RESTful APIs, Swaggers
- Databases: MySQL, PostgreSQL, MongoDB
- UI Framework: Bootstrap, Angular Material, UDS
- Cloud & DevOps: AWS, Docker
- Version Control & CI/CD: Git, GitHub, GitLab, Jenkins
- Other Skills: Performance Optimization, Agile, Stories, Bug Fixing and Tasks

EDUCATION

- Masters in Technology | University Visvesvaraya College of Engineering | 8.8 GPA

- Bachalor of Engineering | Sambhram Institute of Technology | 7.1GPA

PROFESSIONAL EXPERIENCE

- **Unisys India Pvt Limited** 18/10/2021 - 30/09/2022
  Technical Student Intern
  • Assisted in developing responsive UI screens using Angular, HTML, CSS, and TypeScript.
  • Implemented reusable UI components following modular architecture.
  • Worked closely with senior developers to understand coding standards and best practices.
  • Participated in sprint planning, daily stand-ups, and code reviews.
  • Performed bug fixing, DOM debugging, and improved UI responsiveness.
  • Worked with MongoDB for storing and retrieving application and user-related data in enterprise applications.
  • Designed and maintained MongoDB collections, handled CRUD operations, and optimized queries using indexing.
  • Integrated MongoDB with Node.js/Express APIs, ensuring efficient data flow between frontend and backend.

- **Unisys India Pvt Limited** 30/03/2022 - 01/03/2025
  Associate Application Development Engineer
  • Built and optimized Angular modules for banking UIs, reducing load time by 30%.
  • Developed dynamic dropdown filters, modal sliders, and state-managed components using NgRx.
  • Migrated legacy code to Angular 14+ and introduced lazy loading, reducing bundle size by 25%.
  • Worked on JWT authentication with Redis cache for API efficiency.
  • Mentored junior developers and led internal Angular knowledge-sharing sessions.
  • Created hybrid mobile apps using Ionic & Angular deployed to iOS/Android.
  • Converted old JS/jQuery dashboards to Angular-based apps, improving performance by 40%.
  • Created animated SVG icon sets and implemented route-based lazy loading.

- **Quest global / Schneider Electric** 01/03/25 - Currently
  Senior Software Engineer
  • Developed and maintained enterprise applications using the MEAN stack — MongoDB, Express.js, Angular, and Node.js.
  • Built reusable and scalable Angular components using TypeScript, Angular Material, RxJS, and modern Angular development practices.
  • Developed and integrated REST APIs using Node.js and Express.js for communication between frontend and backend services.
  • Worked with MongoDB for application data storage, CRUD operations, and data retrieval.
  Replaced jQuery modals and loaders with Angular Material/Bootstrap, modernizing 300+ UI elements.
  • Removed 900+ jQuery/JS direct DOM implementations, fully shifting to Angular standards.
  • Prevented memory leaks by managing RxJS subscriptions using takeUntil, async pipe, and manual cleanup of intervals and timeouts.
  • Improved rendering performance by using trackBy in ngFor and OnPush change detection.
  • Reduced bundle size by removing unused imports and limiting Angular Material modules.

ACHIVEMENTS AND AWARDS

- Elevate Star Award for UI performance optimization (Q3 2024)
- Internal Speaker: Angular Best Practices and SVG Animations
- Android and iOS App Development Certification by Unisys (Q2 2025)
